

# MOHAMMAD DARAGHMEH

CITIZENSHIP: AMERICAN

## Employment

### IDI Billing Solutions

Software/Quality Assurance Engineer

Rochester, NY

Jun 2015 to Current

- SE: Tasked with creating a complete server interface dashboard (Hal0).
- QAE: Lead role for developing and implementing QA processes for multiple projects/platforms primarily web services.
- Self-educating on various languages (Powershell, C#, and more)
- Writing/Executing/Maintaining automation test script of CostGuard (Client/Server Based)

### Freelancer

Web Developer

2010 to Current

*I have acquired over the years, an arsenal of particular set of skills; skills that have allowed me to acquire independent freelancing projects.*

- Projects varying from implementing a template based site to complete custom websites to web apps.
- Creation/implementation of website, hosting, maintenance of content/database/design, user interface, clone/migration and more.

### Rochester Institute of Technology

Web Developer/Master

Rochester, NY

Aug 2014 to Jun 2015

- Employed as the sole manager for the design (front-end/back-end), implementation, and documentation for RIT's Simone Center.
- This is a high privilege as the Simone Center is RIT's prized gem.
- Managing and maintaining the website's functionality, databases, uptime, and marketing of the website on various platforms.

### EnerNoc

Software Engineer Intern

Boston, MA

Jan 2014 to Jul 2014

- Performed hardware and software R&D on various projects such as PowerTalk (Real-time XMPP communication) for various smart meter devices.
- Online implementations of PowerTalk via Play Framework/Scala/Java.
- Maintaining GitHub repositories, self-educating on various languages (JavaScript/CoffeeScript, Scala, XMPP, and more)

## Projects

### Digital Systems Project

Four week **VHDL** based project in creating, simulating, and synthesizing a behavioral model of a vending machine.

### Hardware Description Lab

The design and simulation of three image processing algorithms in **VHDL** (Contrast increase/decrease, Stretching and Median filtering).

### Intro to Software Engineering Project

A three week **Python Django** infused based project with the purpose of enabling neighbors in a community to be able to share items of common use. That was later enhanced and published online as an independent learning project.

### Problem-Based Intro to CSProject

Ten week **Python** based project for creating an artificial intelligence to play the classical game Quoridor.

### Object Oriented Programming Project

Two week **Java** based project designed in the way of a model-view-controller (GUI/Engine) for the classical game Battleship.
