Daraghmeh Digital
Freelance Web Developer — 2010 to Current
I have acquired over the years, an arsenal of particular set of skills; skills that have allowed me to acquire independent freelancing projects.
- Projects varying from implementing a template based site to complete custom websites to web apps.
- Creation/implementation of website, hosting, maintenance of content/database/design, user interface, clone/migration and more.

Projects

Digital Systems
Four week **VHDL** based project in creating, simulating, and synthesizing a behavioral model of a vending machine.

Hardware Description Lab
The design and simulation of three image processing algorithms in **VHDL** (Contrast increase/decrease, Stretching and Median filtering).

Intro to Software Engineering
A three week **Python Django** infused based project with the purpose of enabling neighbors in a community to be able to share items of common use. That was later enhanced and published online as an independent learning project.

Problem-Based Intro to CS
Ten week **Python** based project for creating an artificial intelligence to play the classical game Quoridor.

Object Oriented Programming
Two week **Java** based project designed in the way of a model-view-controller (GUI/Engine) for the classical game Battleship.
